The World of Work is being rewritten by ***AI***

40% of the jobs worldwide, as per *IMF* estimates, would be taken over by AI. This could affect transforming how people work and highlight the need for continuous upskilling

170M new jobs globally are expected to be created by AI by the year 2030. It is important to be up-to-date about the technological advances related to AI.

300M jobs globally are exposed by AI-driven automation as per *Goldman Sachs.* Upskilling becomes highly relavant in this scenerio.

we offer personalised AI classes for students along with book that help keep your child future ready.

Future is AI
is your child ready to explore it!

Class-by-Class Breakdown

Class 1: What is Artificial Intelligence?

- Simple meaning of AI
- Difference between normal computer programs and AI
- Fun real-life examples
- Activity: Spot AI around you

Class 2: AI All Around Us

- AI in phones, YouTube, maps, games, and school
- How AI makes daily life easier
- Activity: AI scavenger hunt

Class 3: How Does AI Learn?

- AI learns from examples (data)
- Why good data is important
- Simple demonstration of training
- Activity: Train a simple idea with examples

Class 4: Talking to AI (Prompting)

- What is a prompt?
- Why good prompts give better answers
- Weak vs Strong prompts
- Practice with ChatGPT / Gemini
- Activity: Write and improve prompts

Class 5: Using AI for Studies & Homework

- How to use AI for understanding topics
- Getting examples and practice questions
- Making summaries for revision
- Difference between learning with AI and copying
- Activity: Create study prompts for school subjects

Class 6: Using AI Safely & Responsibly

- AI can make mistakes
- Privacy and personal information
- Deepfakes and online safety
- Smart rules for using AI
- Activity: Make your own AI Safety Rules

Class 7: Fun with AI + Mini Projects

- Creative uses of AI (stories, ideas, presentations)
- Hands-on mini projects
- Students create and share their work
- Activity: Complete one creative AI project

Class 8: AI and the Future + Showcase

- How AI may change jobs and the world
- Skills that will remain important
- Student project showcase
- Certificate distribution
- Reflection: What I learned and how I will use AI
